

## IDA WORLD BANK PROJECTS MAP

---

**Description:** This interactive map displays the geographical distribution and details of projects funded by the International Development Association (IDA) under the World Bank. It allows users to explore project details and impact globally, providing a comprehensive view of development efforts worldwide. Project was presented at Tufts University EC136 and at the Harvard NEUDC Conference.

**Features:**

- **Interactive Map:** The map is interactive, allowing users to explore IDA-funded projects globally. This visual representation helps in understanding the geographical distribution of development efforts and their impact.
- **Detailed Project Information:** The map provides detailed information about each project, including the project name, description, funding amount, and status. This offers a comprehensive overview of each project, enabling users to understand the scope and impact of IDA-funded initiatives.
- **Search and Filter Options:** The map includes search and filter options to find projects by country, sector, funding amount, or status (v2). This feature allows users to tailor their exploration to specific interests, making it easier to locate relevant projects and analyze trends.
- **Academic Presentation:** The project was presented in EC136 along with a working paper at Tufts University. This showcases the academic rigor and practical application of the project, highlighting its relevance in the field of development economics.
- **Hosted on GitHub Pages:** The map is hosted on GitHub pages, ensuring accessibility and collaboration. This platform allows for easy updates and contributions from the community, fostering a collaborative approach to development research.

**Live Demo:** Access the Map (live)
